## Jobs move at Clane fertility clinic

Nurses are being sought for a local fertility clinic.

Twenty five staff are working at the Clane medical clinic which has recently been bought by a Spanish based company.

The Barcelona based Institut Marqués bought into the Clane Fertility Clinic this summer.

Its spokesperson, Estefania Redondo, told the Leader that their Clane team comprises 25 professionals including consultants, embryologists, nursing staff, assistants and administration.

### NURSES

This week the clinic has been seeking more nurses.

The Institute, which offers gynecology, obstetrics and assisted reproduction services includes among its treatment methods the playing of music to foetuses.

It says a new device it calls the Embryomobile allows future parents to watch their embryos from their smartphone.

It said it has invested in new technologies and is improving some of the existing facilities in the clinic.
